

# POLARIS

EVD- AUTOMATIC EPU- SEMI AUTOMATIC

**Polaris: a coffee machine with character, with heart, and able to give personality to any location.**

In addition to the new back lit keypad system, it also presents a completely revised design: the body becomes aerodynamic and futuristic, with the possibility of a particular game of RGB LEDs on the side panel that make it unique in its kind.

The Polaris offers multiple customization options as well as an aesthetic design. It is available in both Automatic and Semi Automatic models.

The Automatic model allows 4 programmable buttons per group which allow you to customize programmed doses. It also features a manual push button for manual extraction.

The Semi Automatic is simplistic, featuring only a manual push button for manual extraction. This allows the barista to be responsible beginning and ending the extraction.
